Summary

Experienced web developer with a strong foundation in front-end and back-end technologies. Proficient in creating responsive and user-friendly web applications, ensuring optimal performance and security. Adept at collaborating with cross-functional teams to deliver high-quality projects on time. Passionate about staying updated with the latest web development trends and continuously improving skills.

Experience

Pratham IT System   July 2022 - December 2022
Web Developer Intern   Birtamod, Jhapa
🔗 https://prathamit.com/

I served as an intern specializing in .NET Core development, where I took on the responsibility of enhancing features and resolving issues within a web application designed for a vehicle insurance company.

Crystal Solution   March 2023 - May 2023
Junior Developer   Crystal Solution
🔗 https://www.crystalsolution.com.np/

I held the position of a .NET Core developer and was entrusted with the responsibilities of implementing new features and creating unit test cases for an ERP System.

Somai Connecting Dots   January 2024 - April 2024
Laravel Developer Intern   Butwal, Nepal
🔗 https://ssomai.com.np/info/

I held the position of Laravel Developer Intern, where I was responsible for adding features and fixing issues in the Laravel project.

Education

Mechi Multiple Campus   June 2018 - January 2024
Information Technology(IT)   Bachelor in Computer Application
3.39
🔗 https://mechicampus.edu.np/

I am a BCA graduate with a strong foundation in software development. I have undertaken multiple projects throughout my academic journey, honing my programming, database management, and software development skills. This practical experience, combined with a strong foundation in theoretical knowledge, positions me well for success as I transition from academia to the professional realm.

Projects

Income Expenses Tracker System
🔗 https://github.com/rajiv-k599/IncomeExpenseTrackerSystem

4th-semester project using PHP as the backend and HTML, CSS, and JavaScript as the front end. The objective was to create a platform where users can create categories for income and expense insert all their income and expenses and show their report month-wise using the chart.

Vehcle Rental System
🔗 https://github.com/rajiv-k599/VehecleRent

This was the 6th semester Project, which was developed using Laravel framework as the backend and Bootstrap, HTML, CSS, and JavaScript as the frontend. The Objective was to create a platform where the admin will add, and update vehicles where customers can request to rent a Vehicle.

Study Group
🔗 https://github.com/rajiv-k599/StudyGroup

This was an 8th-semester project created using the Django framework, with HTML, CSS, and JavaScript employed for the front end. The project incorporates a group chat and video call feature utilizing Django channels and AgoraWebRTC. The goal was to develop a platform where users can create or join rooms based on specific topics, enabling communication and resource sharing among participants.
